BONIFACE THUO MWAURA

Phone: +254 705 719 068 | **Email:** bonithuo@gmail.com | **Address:** Kiambu, Kenya
LinkedIn: www.linkedin.com/in/boniface-thuo-52ab3816a

PROFESSIONAL SUMMARY

AI & Data Scientist with 3+ years of experience building production-grade data systems and deploying machine learning models in real-world environments. Experienced in LLM-powered applications, automated data pipelines, predictive modeling, and scalable analytics infrastructure. Strong background in SQL, Python, and model deployment, with hands-on experience in AI-driven automation, sentiment analysis, and system design. Passionate about building auditable, enterprise-ready AI solutions aligned with governance and compliance standards.

SKILLS

Machine Learning, Predictive Modeling, Time-Series Forecasting, Anomaly Detection, Clustering, Statistical Modeling, Feature Engineering, Model Evaluation, Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, ETL Pipelines, Data Cleaning, Data Transformation, Data Modeling, dbt, Data Analysis, Data Visualization, Power BI, Tableau, Google Data Studio, Jupyter Notebook, Git, Jira, Confluence, Excel Automation, Geospatial Data Analysis, KoboToolbox, OD.

AI Poetry Generator - MapenziLink
https://mapenzilink.vercel.app/

Built an AI-powered application leveraging prompt engineering and language models to generate personalized content in real time. Focused on optimizing prompts, user interaction, and output quality.

EXPERIENCE

Upwork | Freelance | Remote | Jan 2022 – Present
Roles and Responsibilities:
● Leveraged AI tools and data workflows to generate insights and automate analysis processes for clients
- Built automated data workflows and streamlined data processing using scripting and AI-assisted tools.
- Conducted model validation and back-testing to evaluate predictive stability across historical datasets.
- Developed clustering and segmentation analyses to support business decision-making and market targeting.
- Designed relational data models and ERDs to support scalable analytics and reporting systems.
- Collaborated with cross-functional teams to integrate data pipelines into operational workflows and reporting dashboards.

Ai Systems & Workflows
Fiverr | Part-Time | Remote | November 2025 – Present
Roles and Responsibilities:
- Built AI-assisted content generation workflows using ChatGPT for structured outputs (emails, reports, scripts)
- Developed prompt frameworks for consistent and high-quality AI responses across tasks
- Used AI tools for rapid data analysis, summarization, and insight generation
- Integrated AI into daily workflows to reduce manual effort and improve efficiency
- Experimented with multiple AI platforms to identify best tools for specific business use cases

Data Analyst
Kalon Foods | Part-Time | Hybrid | Jun 2025 – Aug 2025
Roles and Responsibilities:
● Conducted exploratory data analysis (EDA) and built interactive dashboards to monitor inventory turnover, sales trends, and demand forecasts across multiple product categories.
● Reduced stock-outs and overstocking incidents by 28% through predictive modeling using Python and time series forecasting techniques.
● Designed and maintained data schemas for sales, inventory, and procurement datasets.
● Designed and maintained quantitative data systems and reporting workflows for multiple clients, ensuring

consistency and usability across projects.
● Built and automated Excel-, SQL-, and Python-based data pipelines to consolidate large datasets and improve reporting efficiency by over 50%.
● Developed dashboards and reporting tools to track performance metrics and program outcomes for decision making.
● Implemented data validation checks to ensure data integrity from multiple sources (Excel, ERP exports, and Google Sheets).

Machine Learning Specialist
Data Visualization Intern
Excelerate | Remote | Apr 2025 – June 2025
Roles and Responsibilities:

- Assisted in cleaning and transforming large datasets to ensure readiness for visualization and analysis across internal reporting tasks.
- Conducted systematic data cleaning, validation, and integrity checks across multiple client datasets.
- Developed interactive dashboards in Power BI and Google Data Studio for monitoring program metrics
- Developed robust SQL queries and ETL pipelines to integrate, clean, and transform large datasets for multiple clients.
- Designed interactive charts and dashboards using Power BI and Tableau, enhancing data accessibility and decision-making.
- Collaborated with cross-functional teams to align data visuals with business goals and user requirements.
- Validated data accuracy and integrity in visual outputs, identifying and resolving inconsistencies during the design process.

EDUCATION

- **Bachelor of Science in Animal Science with Information Technology|** Maseno University | 2018

CERTIFICATION

- **Certification in Data Science |** Moringa School | 2024 | Focused on Python (pandas, NumPy, matplotlib), SQL and Tableau.)

- **Certification in Artificial Intelligence** | Moringa School| 2025

TOOLS

ChatGPT, Claude, Gemini, Zapier, Make, n8n Python, SQL, JIRA, Copilot, Visio Tableau, Microsoft Office, IBM Data Architect, KoboToolbox, ODK, Jupyter Notebook, Google Sheets, Zoom, Slack, Power BI, Google Data Studio, Notion, Trello, R, Stata, SPSS, Epi, Arc, QGIS, Asana, Antigravity, TensorFlow Framework, Scikit-learn Library.

LANGUAGES

- English - Fluent
- Swahili - Native
